

C1  
CONT.

a control step of controlling said data processing step and said display step in accordance with the data control information extracted in said data analysis step,

wherein said control step inhibits execution of inhibited process in accordance with the data control information extracted from the data and controls said display step to change a display style of the process function of each of the various processes to an inhibition display style.--

### REMARKS

Claims 1-10, 16-26, 57, and 59 are pending in this application, with Claims 1, 16, 57, and 59 being independent.

Claims 27-29, 38-56, and 58 have been cancelled without prejudice to or disclaimer of the subject matter presented therein.

Claim 59 has been added. Applicants submit that support for the new claim can be found in the original disclosure, and therefore no new matter has been added.

Applicants note with appreciation that Claims 1-10, 16-26, and 57 have been allowed. Applicants submit that Claim 59 should also be allowed. Claim 59 is a method claim corresponding to allowed Claim 1.

Claims 27-29, 38-56, and 58 stand rejected under 35 U.S.C. §103 as being unpatentable over U.S. Patent No. 5,982,891 (Ginter, et al.). This rejection is now moot. Further, Applicants submit that new Claim 59 is allowable for reasons similar to Claim 1.

In view of the foregoing, Applicants submit that this application is in condition for allowance. Favorable consideration, withdrawal of the rejection set forth in the above-mentioned Office Action, and an early Notice of Allowance are requested.

Applicants' undersigned attorney may be reached in our Washington, D.C. office by telephone at (202) 530-1010. All correspondence should be directed to our below-listed address.

Respectfully submitted,

Attorney for Applicants
